

## Standards of Training in Gas Work

### Gas Skills Training and Assessment

<b>Information Sheet</b>	<b>IMPORTANT - This course was formerly known as <u>ACOPS</u></b>
<b>Title</b>	STGW 140 An Introduction to LPG (non-technical)
<b>Duration</b>	1 day
<b>Aim</b>	To provide a non-technical overview in the use of LPG.
<b>Objectives</b>	At the end of this course you will be able to:  <ol style="list-style-type: none"><li>1) State the safety precautions required</li><li>2) Understand basic control and storage requirements</li><li>3) Recognise incomplete combustion and it's hazards</li></ol>
<b>Audience</b>	This course is designed for people who may encounter LPG during their day to day routine.
<b>Pre-Requisites</b>	Candidates should have completed a basic health and safety course.
<b>Training</b>	The training programme will utilise our <b>Book 7 An Introduction to LPG (non-technical)</b> training manual and encompass the following topics:  <ul style="list-style-type: none"><li>• All about LPG</li><li>• What can LPG be used for?</li><li>• How to store LPG</li><li>• How to use LPG</li><li>• All you need to know about flexible hoses</li><li>• What is combustion?</li><li>• Gas safety advice</li></ul>
<b>Understanding</b>	The candidate's satisfactory understanding of the subject matter will be established by the administration of a short multi-choice question paper. This evaluation will be conducted by an assessor qualified to A1 or equivalent standard.
<b>Verification</b>	The evaluation process will be verified by an internal verifier qualified to V1 or equivalent standard.
<b>Certification</b>	The programme will be certificated by LPG Training & Assessment Ltd and a certificate of training issued to successful attendees. Photo ID cards are available.  Alternatively we can arrange certification through an Awarding Body accredited by UKAS and compliant with BS EN ISO/IEC 17024. Please inform us of this preference at the time of order as this will involve additional time and cost.
